

Protectcoat Wood SR

Protectcoat Wood SR

Protectcoat Wood SR is a water-based product. It contains biodegradable organic acids. These natural acids are found in plants. This product will turn wood back to the original colour. Protectcoat Wood SR can also remove stains from tannin runs, rust, watermarks, iron, light dirt and stains caused by surface mould.

Application:

Apply with a roller and non-metal brush.

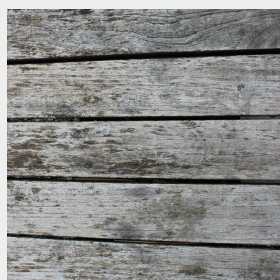

Apply Protectcoat Wood SR generously. The wood to be treated should be coated evenly on all visible sides of each panel to prevent difference in colour. Leave the Protectcoat Wood SR for 15 – 30 minutes. On dirty wood use a non-metal brush for scrubbing. Rinse away the Protectcoat Wood SR thoroughly with clean water.

It is not recommended to use a pressure washer as this clean.
